

ANAJAK
SOLUTIONS

2026 PRODUCT & SERVICE PORTFOLIO

Technology and security, built for how your business runs.

A single partner for business software, cybersecurity, compliance, and managed IT — from the systems you run every day to the standards you're audited against.

● Business Software

● Cybersecurity

● Compliance

● Managed IT

● Licensing

WHO WE ARE

One partner for the systems you run and the **standards** you meet.

Anajak Solutions designs, builds, and supports the technology backbone of growing organizations — business management software, cybersecurity products, retail systems, and managed IT — alongside the compliance and advisory work that keeps it all audit-ready. Every engagement is delivered end to end: consultation, implementation, and ongoing support from one accountable team.

 Compliance Service 12 offerings	 Cybersecurity Services 9 offerings	 Managed Services 4 offerings	 Licensing Service 3 offerings

Business Management Solutions

7 PRODUCTS — the software that runs daily operations

HR Management System

Hiring, payroll, leave, and performance tracking in one connected platform.

Document Management System

Centralize, secure, and version-control company documents and records.

Project Management System

Plan, assign, and track projects and teams with real-time visibility.

Asset Management System

Track IT and company assets from procurement through to retirement.

Ticketing / Helpdesk System

Log, route, and resolve internal and customer support requests.

Learning Management System

Deliver, track, and certify employee training and development.

Network and Server Monitoring System

Monitor uptime, performance, and health of your IT infrastructure 24/7.

Cybersecurity Products

3 PRODUCTS — platforms for risk, governance, and incidents

IT Risk Management Platform

Identify, assess, and prioritize IT risk across the organization.

GRC Platform

Unify governance, risk, and compliance management in a single system.

Security Incident Management

Detect, log, and respond to security incidents with full traceability.

Retail & SME Solutions

5 PRODUCTS — tools built for retail and growing businesses

POS System

Fast, reliable point-of-sale built for retail and F&B operations.

Stock and Inventory Management

Real-time stock visibility across warehouses and outlets.

Attendance System

Biometric and mobile time & attendance tracking.

E-Commerce Platform

Sell across Telegram, mobile app, and web from one backend.

Booking System

Online scheduling and reservations for services and appointments.

IT Service

4 SERVICES — installation and configuration on site

Install & Configure CCTV

Surveillance system design, installation, and configuration.

Install & Configure Access Control

Card, biometric, or mobile access control for your premises.

Server & Workstation Setup

End-to-end setup of file, email, and application servers and work stations.

Install & Configure Printer

Network printer deployment and configuration.

Managed Services

4 SERVICES — ongoing operation of your IT environment

Managed Infrastructure

Ongoing management of servers, applications, and work stations.

Managed Backup

Scheduled, monitored backups with tested recovery.

Managed Security

Continuous monitoring and response for your security stack.

IT Helpdesk

On-demand support for your team, whenever issues come up.

Compliance Service

12 SERVICES — consulting, assessment & remediation across major frameworks

PCI DSS & PCI PIN

Consulting, assessment, and remediation for payment card standards.

SOC 2

Consulting, assessment, and remediation for SOC 2 readiness.

NIST 800 Series

Consulting, assessment, and remediation against NIST 800 controls.

IT Governance

Structuring decision rights and accountability for IT.

IT Audit

Independent review of IT controls and practices.

Policy & Procedure Development

Drafting the policies your standards and audits require.

ISO 27001 / 27017 / 27018 / 9001

Consulting, assessment, and remediation across ISO management systems.

SWIFT CSP

Consulting, assessment, and remediation for the SWIFT Customer Security Programme.

TCRMG

Consulting, assessment, and remediation against TCRMG requirements.

IT Risk Assessment

Identifying and prioritizing risk across IT systems and processes.

IT General Controls (ITGC)

Assessment of the controls that underpin financial and operational systems.

Security Awareness Training

Building a security-conscious culture across your teams.

Cybersecurity Services

9 SERVICES — find, test, and respond to real security risk

- | | |
|--|--|
| <ul style="list-style-type: none"> ✓ Vulnerability Assessment
Systematic scanning to surface exploitable weaknesses. | <ul style="list-style-type: none"> ✓ Penetration Testing
Simulated attacks to test real-world exposure. |
| <ul style="list-style-type: none"> ✓ Security Assessment
A holistic review of your security posture. | <ul style="list-style-type: none"> ✓ Security Architecture Review
Evaluating how systems are designed to resist attack. |
| <ul style="list-style-type: none"> ✓ Network Security Assessment
Testing the resilience of your network perimeter and internals. | <ul style="list-style-type: none"> ✓ Cloud Security Assessment
Reviewing cloud configuration and access against best practice. |
| <ul style="list-style-type: none"> ✓ Application Security Assessment
Testing applications for exploitable logic and code flaws. | <ul style="list-style-type: none"> ✓ SOC Assessment
Evaluating the effectiveness of your security operations. |
| <ul style="list-style-type: none"> ✓ Incident Response
Rapid containment, investigation, and recovery when it matters. | |

What you receive with every engagement

Executive summary

A plain-language overview of risk for leadership and stakeholders.

Technical findings

Detailed evidence, severity ratings, and affected systems.

Remediation roadmap

Prioritized, actionable steps to close identified gaps.

Licensing Service

3 SERVICES — genuine software licensing, sourced and managed for you

Office 365, Professional

Licensing and provisioning for Microsoft's productivity suite.

Anti-Virus Licensing

Kaspersky, Avast, Bitdefender, ESET, McAfee, and Microsoft options.

Windows Server License

Licensing for Windows Server environments.

Why work with Anajak Solutions

Certified expertise

Delivery backed by hands-on experience across ISO, SOC 2, PCI DSS, and NIST engagements.

End-to-end delivery

One team for consulting, implementation, and the day-to-day support that follows.

Built around your risk

Recommendations sized to your business, not a one-size template.

Responsive support

A helpdesk and managed-services team that's reachable when something breaks.

LET'S TALK

Ready to strengthen your systems and your **compliance?**

01

Discovery call

We walk through your systems, risks, and goals.

02

Tailored proposal

A scoped plan and quote matched to what you need.

03

Onboarding & delivery

Implementation, training, and support from day one.
